

HOW TO PREPARE FOR CAMP 2021

1. **Pack your masks** - We're asking every family to provide their child with 7 masks for their 5 day session of camp.

2. **Limit exposure before and after camp** - For the 7 days prior to camp, please limit your child's activities that increase their exposure to COVID-19.

- **Please refrain from attending:**
 - Large group gatherings indoors (more than 3 households)
 - Large public gatherings (sports events, concerts, theme parks)
 - Attending school is admissible
- **Consider making a plan for your child's return from Camp** in regards to limiting activities before returning to school or other group/public activities.

3. **Get a PCR test** - within 3 days of your child's first day of camp.

- **To submit your test result you can:**
 - Upload your result to Camp Doc
 - Email result to info@campdelcorazon.org
 - Bring result printed out to the boat on your child's first day of camp
- **If you cannot get a PCR test** - we will provide a rapid test at the boat.
 - *WARNING:* Rapid tests have a small chance of false *positive* results. If you do not submit a negative PCR test to us prior to camp and your child tests positive with our Rapid test, your child will not be allowed to come to camp.
- **Resources for finding a PCR test in your area**
 - [Free PCR Tests in LA County: https://curative.com/](https://curative.com/)
- **If you're traveling via public transportation from outside of California and your child is NOT vaccinated you must ALSO:**
 - Arrive in CA 7 days before the first day of your session
 - **Submit proof of arrival by:**
 - Uploading your ticket as proof of travel to your Campdoc Prescreening Tool OR
 - Sending a copy of your ticket to sheree@campdelcorazon.org

4. **Get Vaccinated if eligible (Optional)**

- While we are not requiring campers 12 and older to be vaccinated, as a medical special-needs camp we are strongly encouraging that all eligible and willing families get their teens vaccinated before camp.
- Fully vaccinated = two weeks after your final dose.
- Find more information at <https://myturn.ca.gov/>
- Vaccinated campers will still need to submit a PCR test prior to camp, or be rapid tested at the doc.

What we're doing to keep your child safe while at camp

In accordance with federal, state and local guidelines, and in order to keep your child safe this summer, we are introducing the following measures for this year:

- **Cohorting** – Campers will be assigned to a small group of campers called a “cohort.” They will do all activities within this cohort in order to limit your child’s exposure while at camp.
- **Masks** – Campers and Staff will be required to wear masks in situations where ventilation and social distancing cannot be maintained.
- **Social Distancing** – Distance will be maintained between cohorts throughout the entirety of camp. In the rare instances where this is not possible (i.e. while on the boat to camp), everyone will be instructed to wear masks, and maximal distancing and ventilation will be employed.
- **Increased sanitation** – Additional handwashing stations and practices will be put in place. Shared supplies and high-touch areas will be sanitized frequently.
- **Modified Activities** – Some traditional Camp activities will have new or limited structure and/or rules to accommodate the need for sanitation or social distancing.
- **Response Plan** – Camp del Corazon is uniquely positioned to respond to medical challenges. We have a robust emergency response plan already in place, and have adapted that plan to include protocols in the unlikely event that COVID comes to camp.

While we cannot guarantee your child will not be exposed to COVID-19 while at camp, we are building a program and protocols that will keep our population safe, and allow us to respond quickly and effectively. It helps if you do your part to bring us healthy campers, so we can return you happy campers. Thank you for your trust, we look forward to a safe and fun year of camp!
